MOBILE LABORATORY

Trailer

Mobile Laboratory Trailer is composed of a specific material that is resistant to varying concentrations of acid and chemical compounds and is readily cleaned with cleaners like alcohol and detergent.

Throughout the right places in the rooms, there are foamboard cabinets, tables, and drawers. There is a separate heating and cooling system from the container. An antibacterial, waterproof pvc covering covers the entire floor. Accessories and a sink system are present.

Pure water device, blood counter, urine analyzer, incubator, centrifuge, microscope, chiller, various laboratory supplies, patient examination table, and equipment are all present in the laboratory.

What is the Function of Mobile Laboratory Trailer?

The mobile laboratory provides a variety of on-site services, traveling to places where outbreaks can occur, serving as agricultural testing labs, training classrooms, and even archeology labs. Depending on the specific goal, mobile laboratories are equipped with equipment and technology for a variety of specific requirements

Mobile laboratory Trailer provide specific healthcare services such as:

Anthropometry assessments

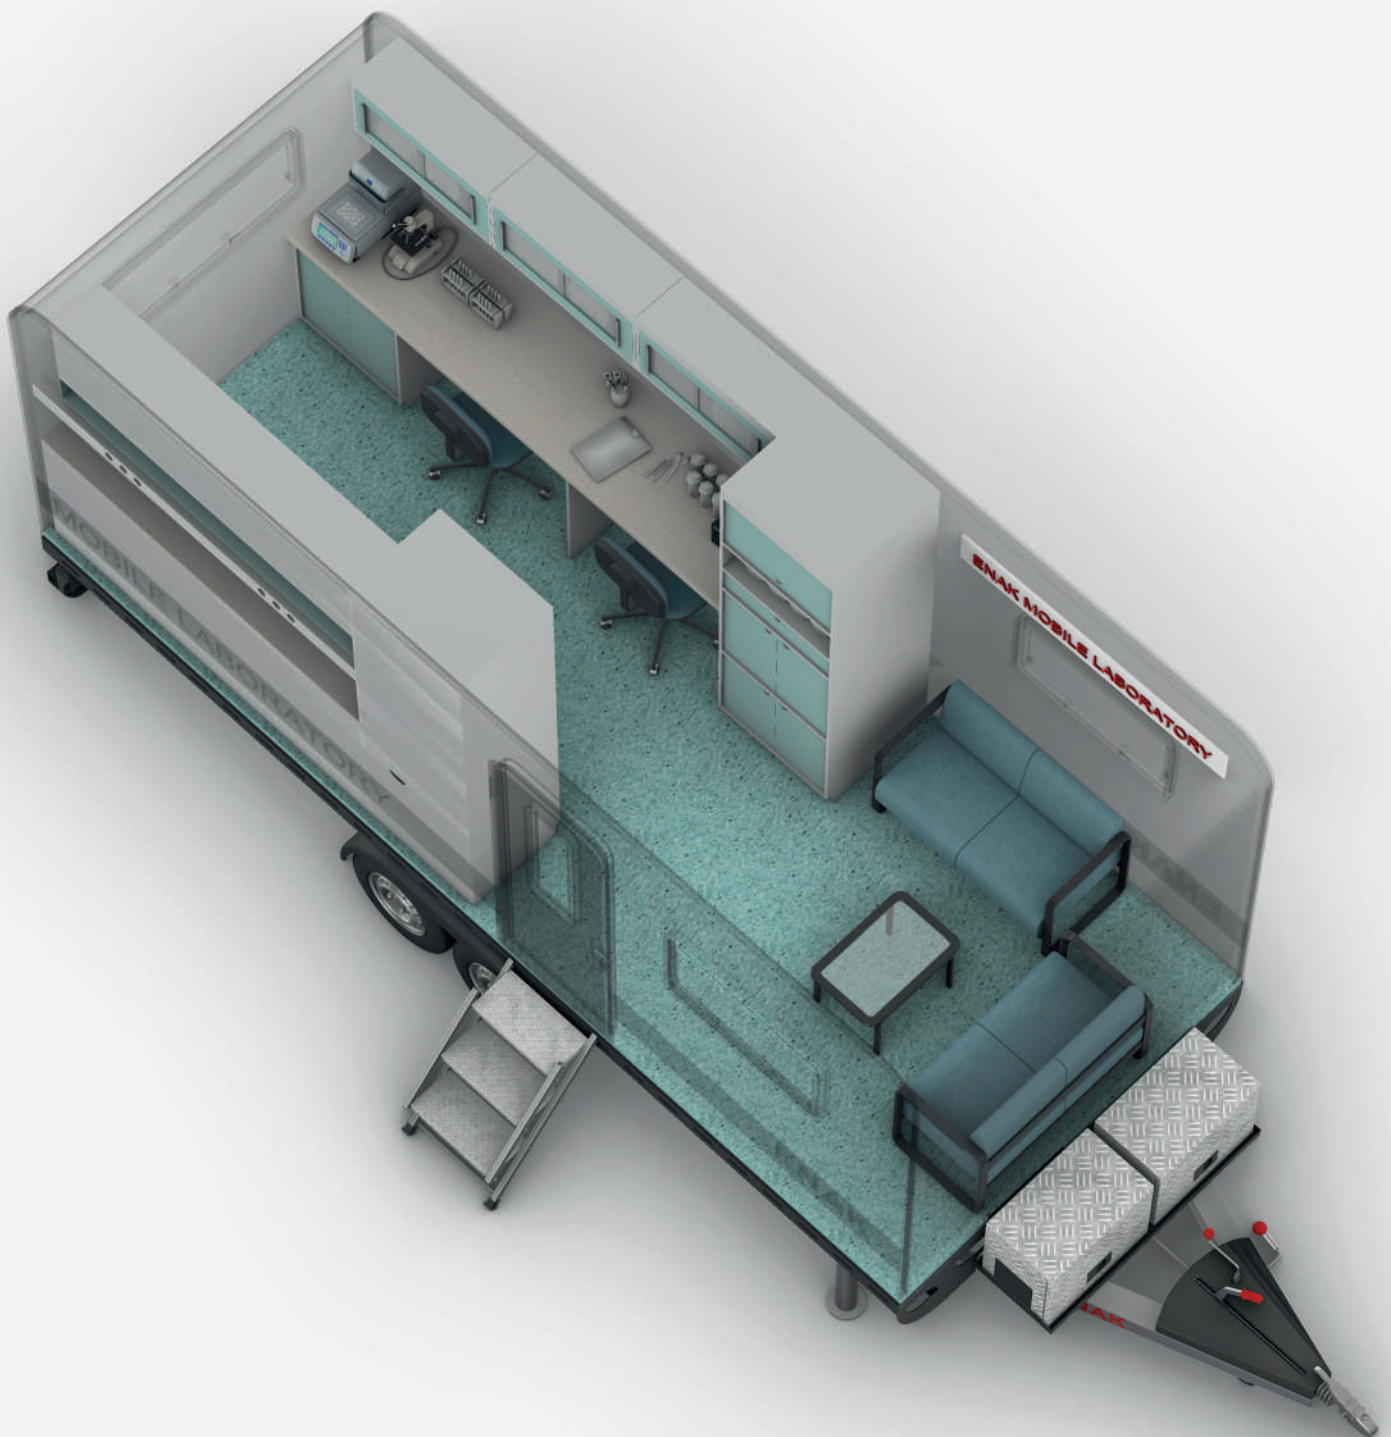

Blood chemistry measurements

Condition assessments such as wearing a mask and pulmonary function testing

Repair highly specialized equipment such as prostheses

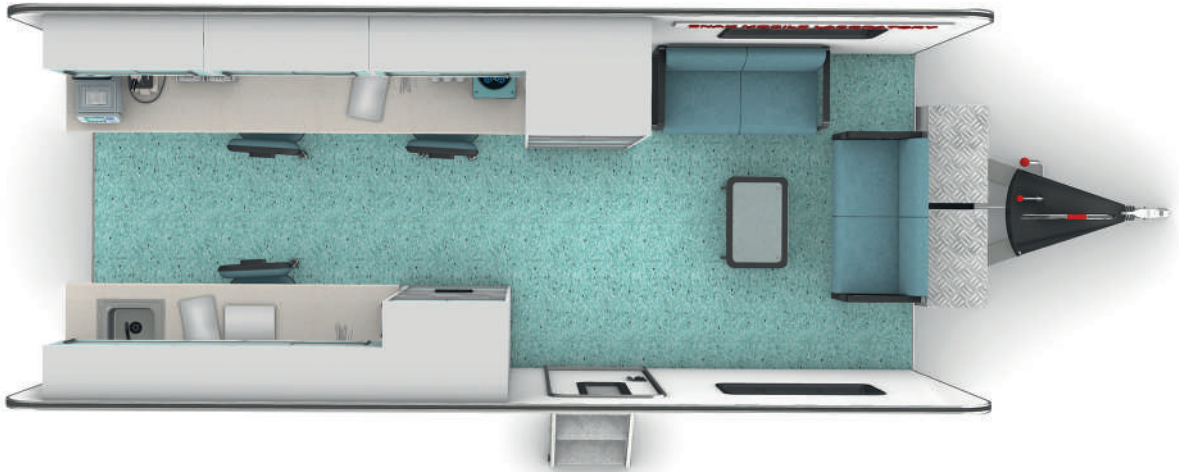

Mental health screenings

Nutritional analysis, often including macro and micronutrient analysis, obesity and diabetes prevention programs

MOBILE GYNECOLOGY CLINIC

Trailer

At Enak, we build customised Gynecology Trailer, which we convert and design according to wishes and needs of customers.

It is designed in order to gynecological examine or make outpatient treatment to patients who live in rural areas and have limited access to the hospital.

It can consist of many rooms. It can have a locker room, in which the women can dress up and undress.

The gynecological examination table can be mounted in the middle of the trailer. There can be made urologic and minor surgical operations.

There is a reception area for initial screening of patients and a waiting area (with a lavatory for both patients and staff).

The floor of the gynecological examination container was covered with an epoxy material that can be cleaned easily.

Some of the equipment that can be implemented into these trailer clinics are:

- 1) Ultrasound Machines;
- 2) fetal monitors;
- 3) PAP smear tests;
- 4) other female test equipment; etc.

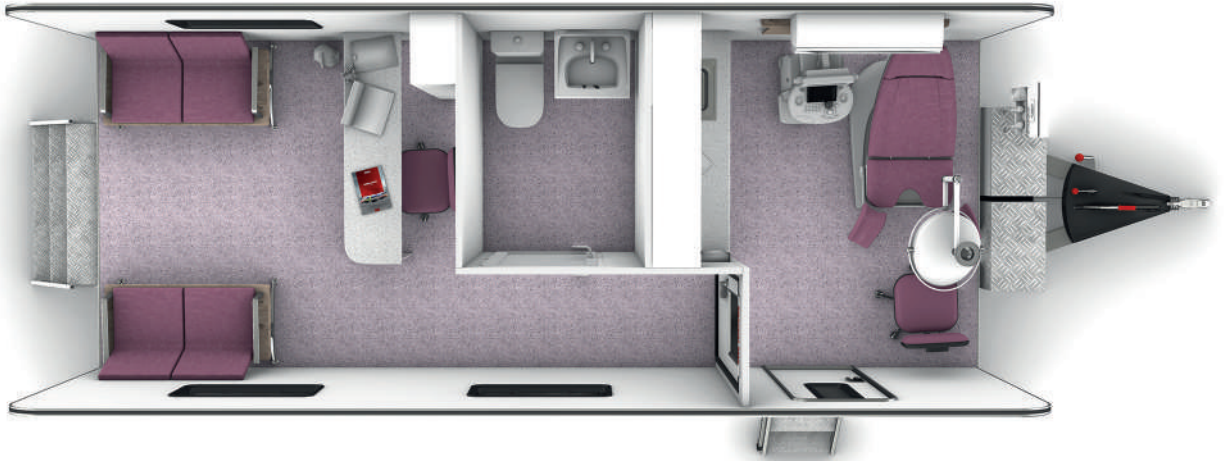

All of these mobile women's centers are fully capable of traversing the worst road networks on the planet in order to bring women's healthcare treatment to the most remote patients and villages in the world.
